Financial and Estate planning go hand in hand. Financial Planning helps gain assets and Estate Planning protects those assets once realized.

The first part of the course will focus on how public safety professionals can effectively manage and invest their money to augment their salary and to prepare for retirement.

The second part will synopsize the Probate Court process and will teach participants how to avoid Probate through Trusts, LLC's, Joint Tenancy, and POD accounts.

Each attendee is entitled to a free 1-hour individual consultation with either or both presenters on a later date.
